CNH – CSPS

Work progress meeting

May 13, 2026

agenda

New screenshot capture

Development

Review

Localizations

Concept

A highly practical, how-to learning experience designed to help learners become familiar with the CSPS interface and navigation paths.
Built around a microlearning approach, the course delivers short, progressive learning moments using:

- guided mini-steps
- callouts
- hotspots
- knowledge check

This approach is intended to improve user autonomy and speed of use.

Structure

- Introduction and learning objectives
- Navigation instructions within the course
- Main menu
- 7 chapters with intermidiate knowledge check
- Final assessment

Graphic proposal

Reference file: CNH-CSPS Training_graphic proposal_240326

Materials

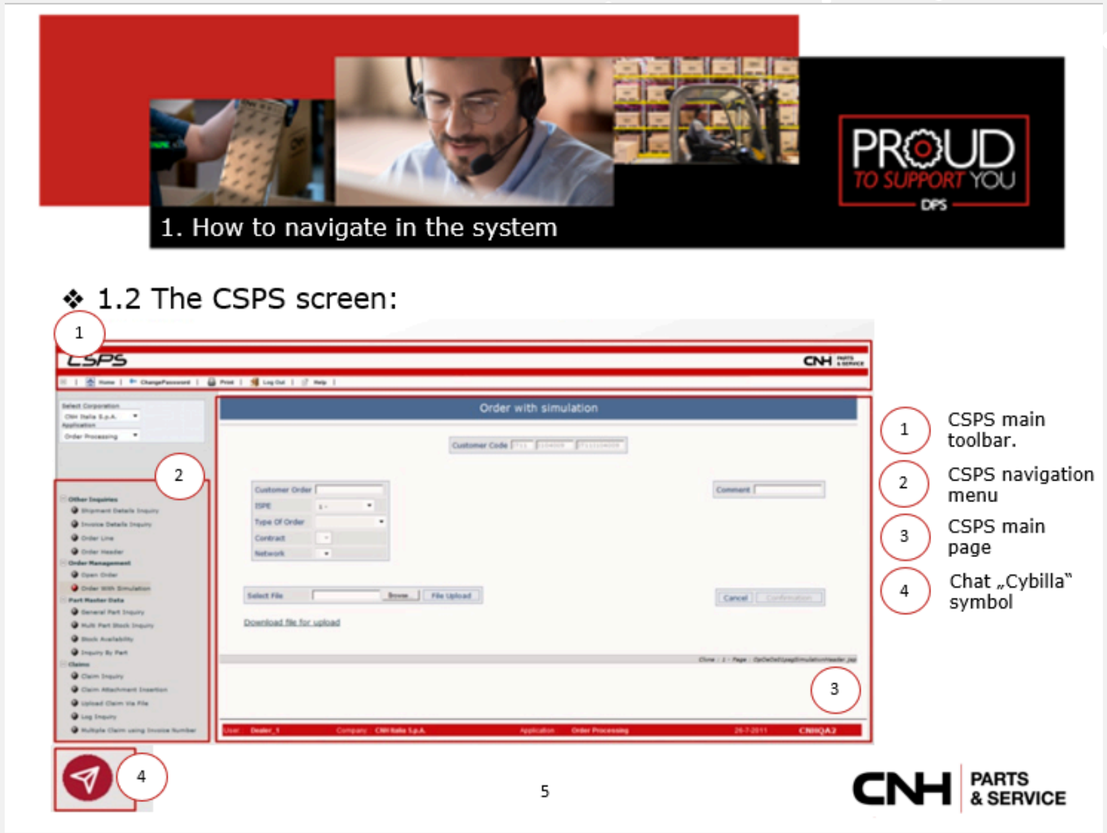

IN PROGRESS

Reference file: CSPS Training V1_2025 en.pptx

It has been agreed that all low-quality screenshots and those that are difficult to read or include numbers and overlay boxes will be redone.

The **new screenshots** will be provided by CNH. The activity is ongoing.

This is not a blocking activity for starting development.

Storyboard

Reference file: CNH_CSPS_storyboard_220426 NEW

The storyboard content is approved, in terms of the **slide content,** the **script** included in the notes and the overall **duration** of the course.

inRebus will proceed with the development phase, creating a single module divided in 7 chapters.

Final assessment

Reference file: CNH_CSPS_Final Assessment_270326

The file includes 25 questions. Given that there are several interactions throughout the training, our proposal is to include around 10 questions in the final test.

CNH has reviewed the file, and it has been agreed that a question bank will be created, from which the course will randomly select **6** questions for each attempt.

Development

Some questions:

- What is the correct pronunciation of “Cybilla”? “Sibilla”
- Would you like to include slide numbering? Yes
- Should we provide a final PDF to download once the student had completed the course? Yes. The PDF will include all the tool content, but not the test.
- A new version of the storyboard was sent on April 22, including clarifications on the open points within the storyboard. It still needs to be confirmed whether to include the slide dedicated to “**Weight, Dimensions and Packaging.”** No need to add a new slide.

Review

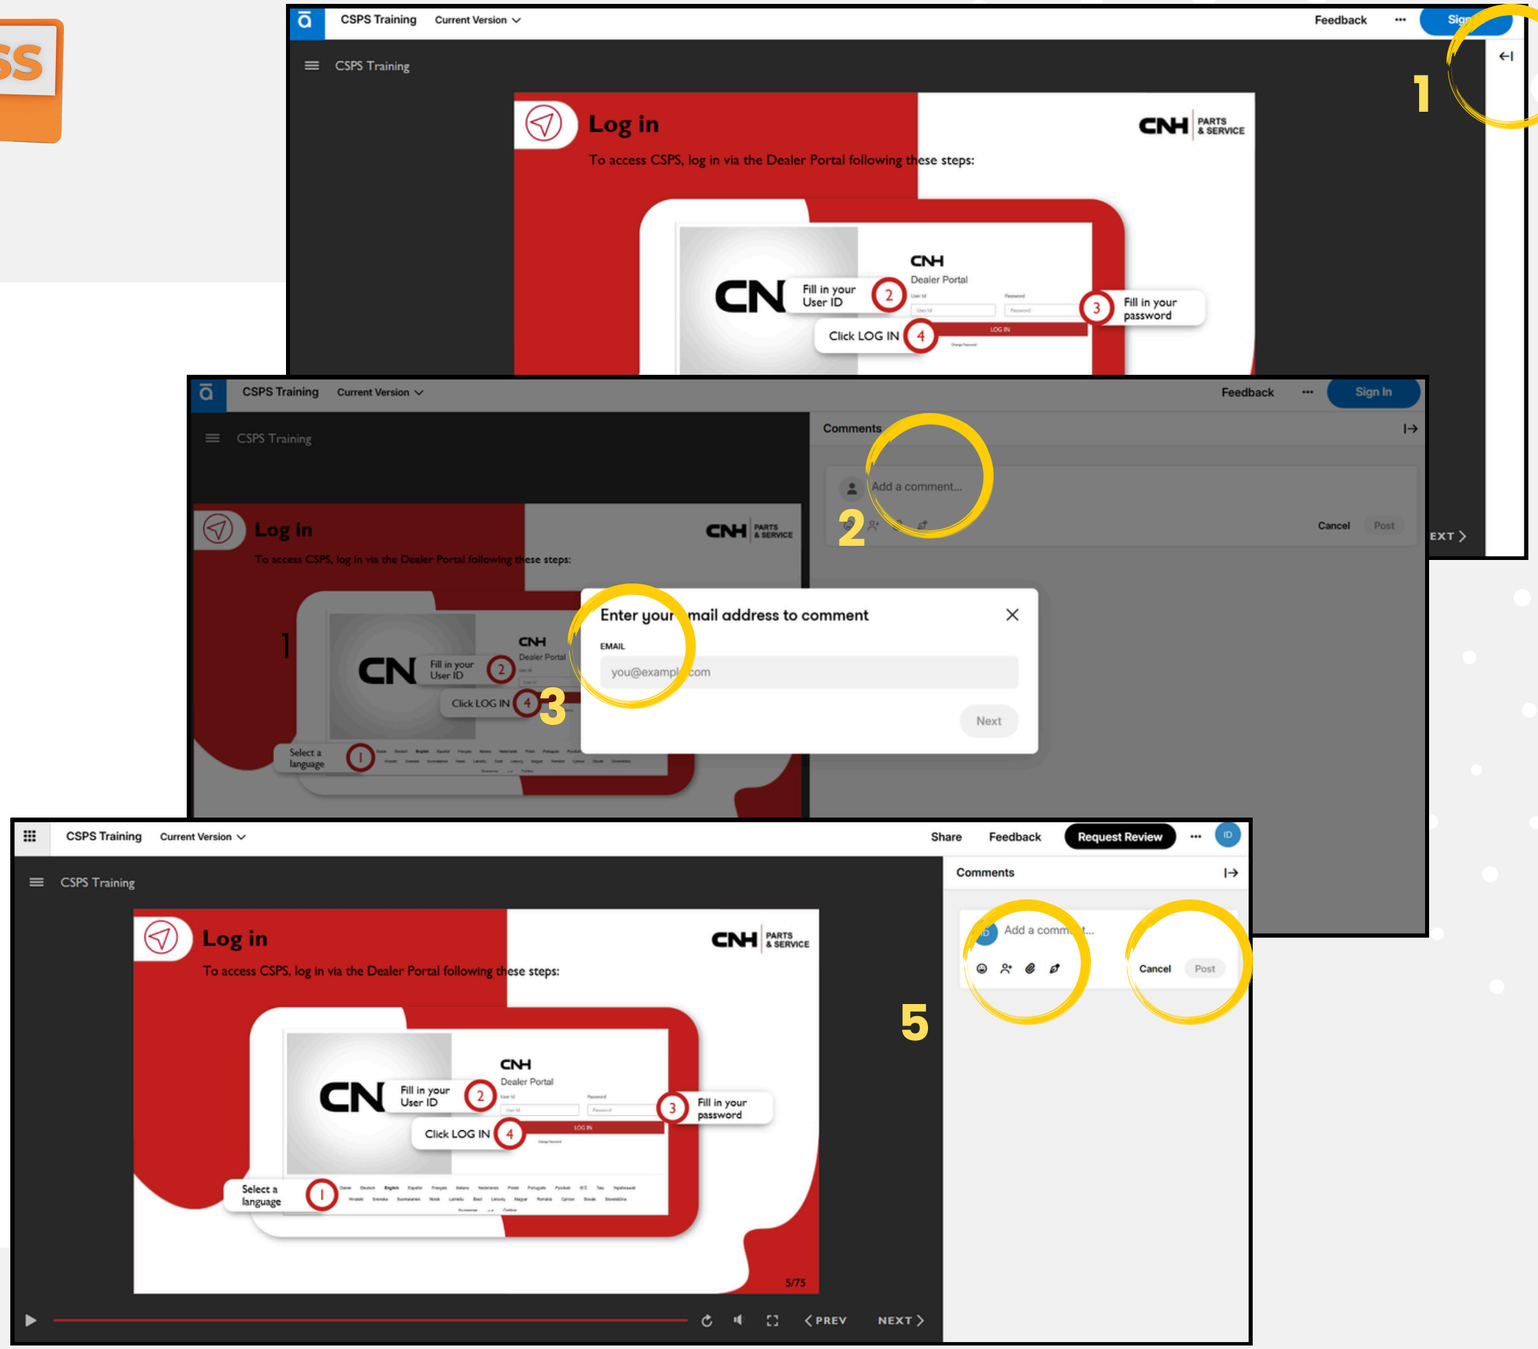

IN PROGRESS

CNH needs to review **all content** shown in the slides, as well as the audio transcript included in the Notes section.

All feedback need to be add in the **review area**.

To add a comment, please follow these steps:

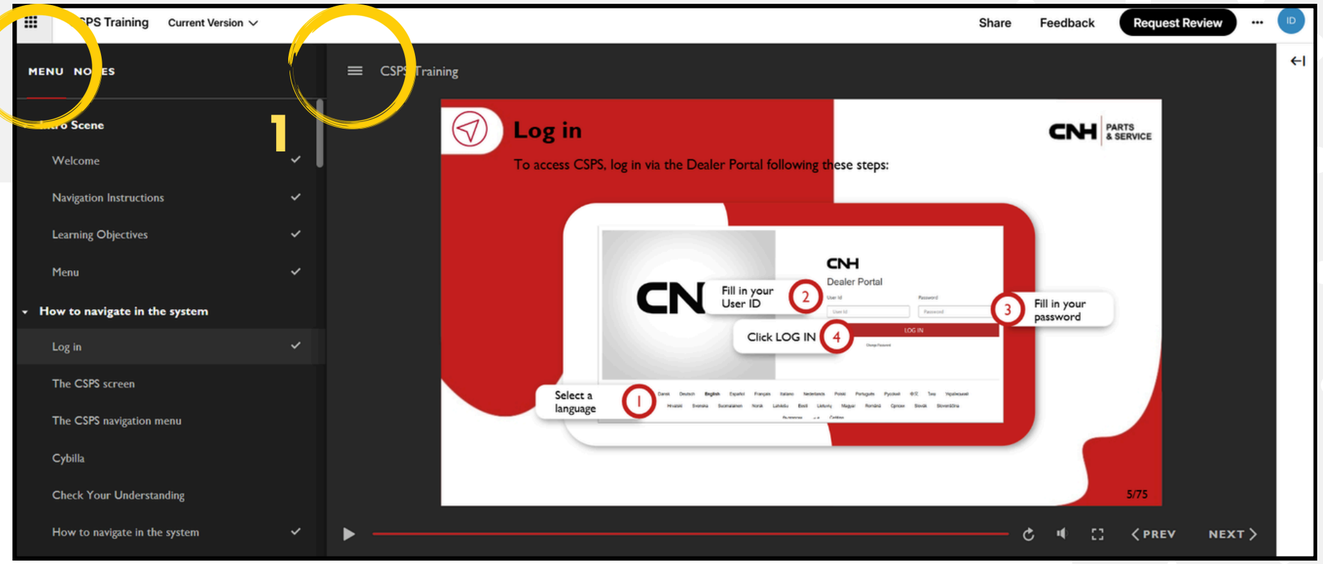

1. Click on the **arrow** in the top right corner.
2. Click on **“Add a comment”.**
3. Enter your **email** address.
4. Go to the **slide** you would like to comment on.
5. Write your comment and click on **“Post”**. You can also use the **pen tool** to highlight the specific area of the slide your comment refers to.

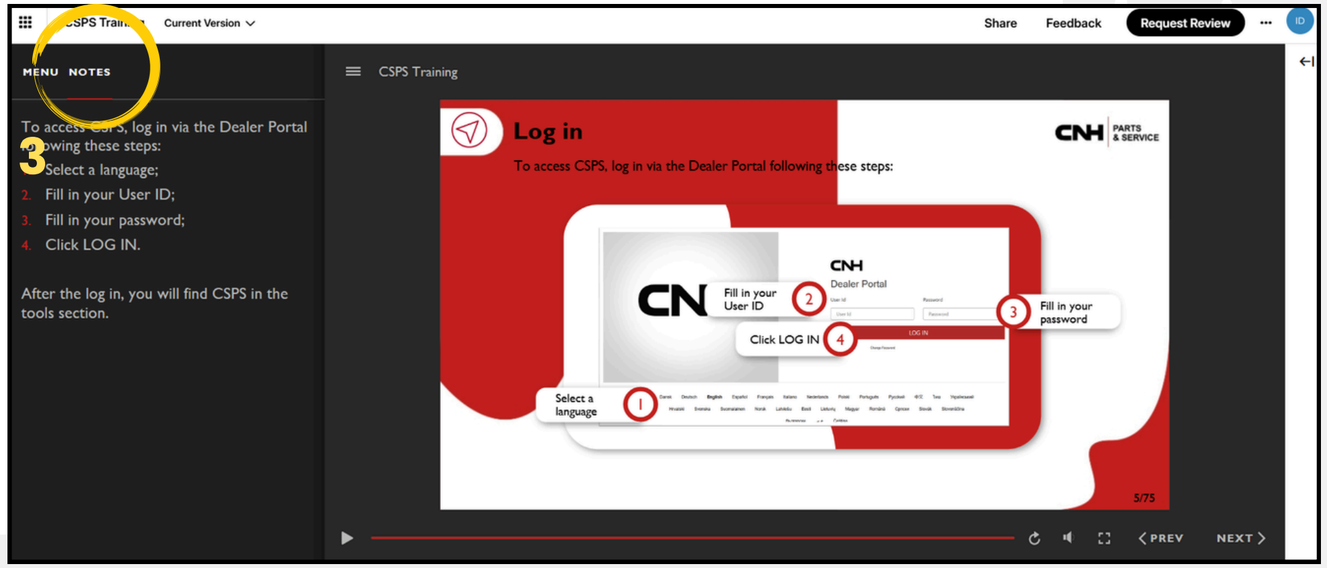

Review

IN PROGRESS

By clicking on the **menu icon** in the top left corner (1), you can access the **index** (2) of the slides and the **notes** section (3), where you can read the audio transcript.

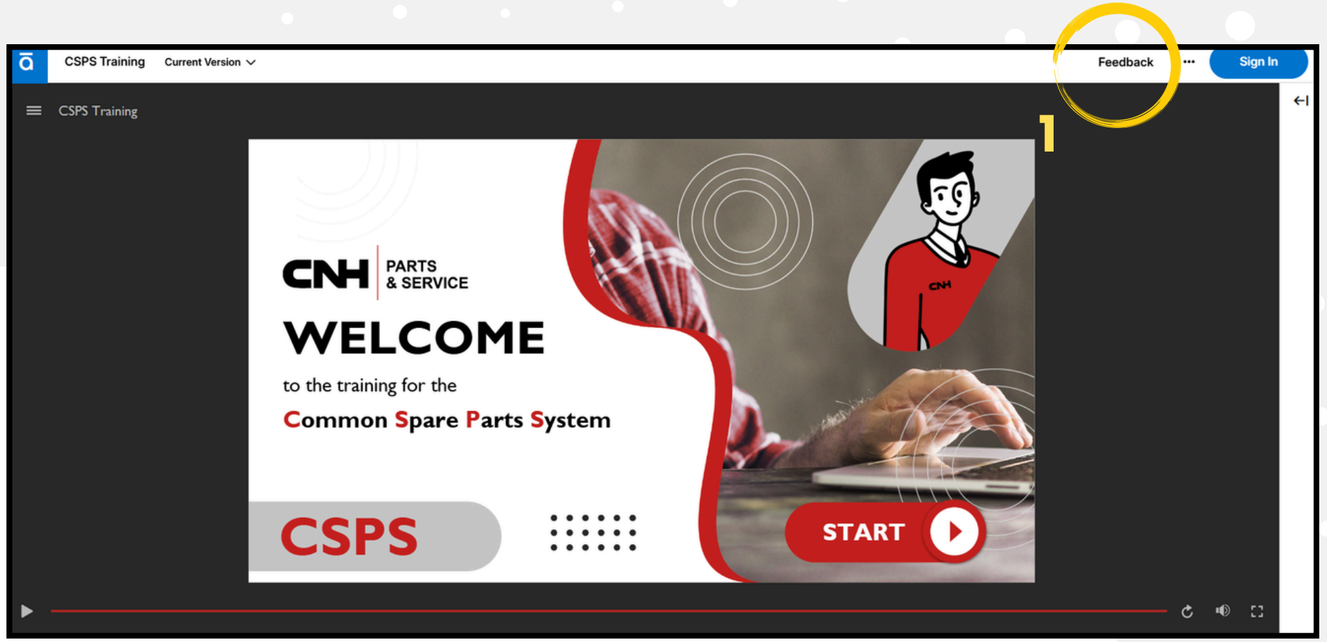

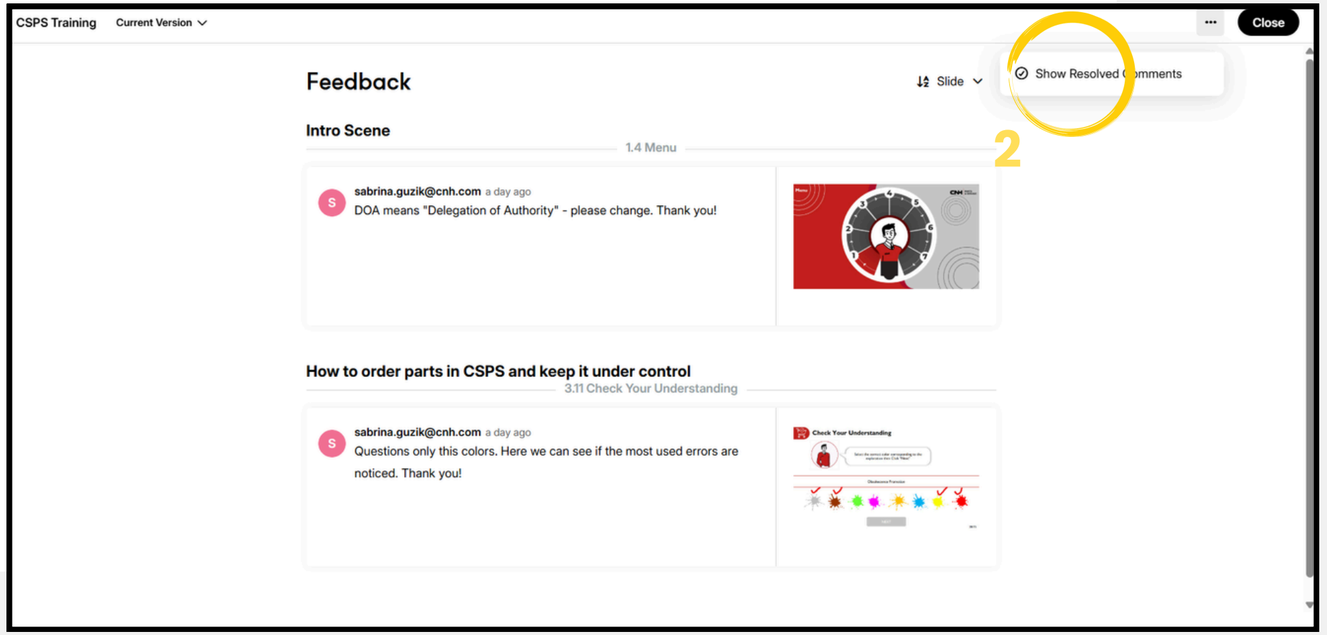

Review

IN PROGRESS

To get an overview of all the comments added, click **Feedback** (1).

To view also the comments that have been resolved, click the three dots in the top right, then click **Show Resolved Comments** (2).

Localizations

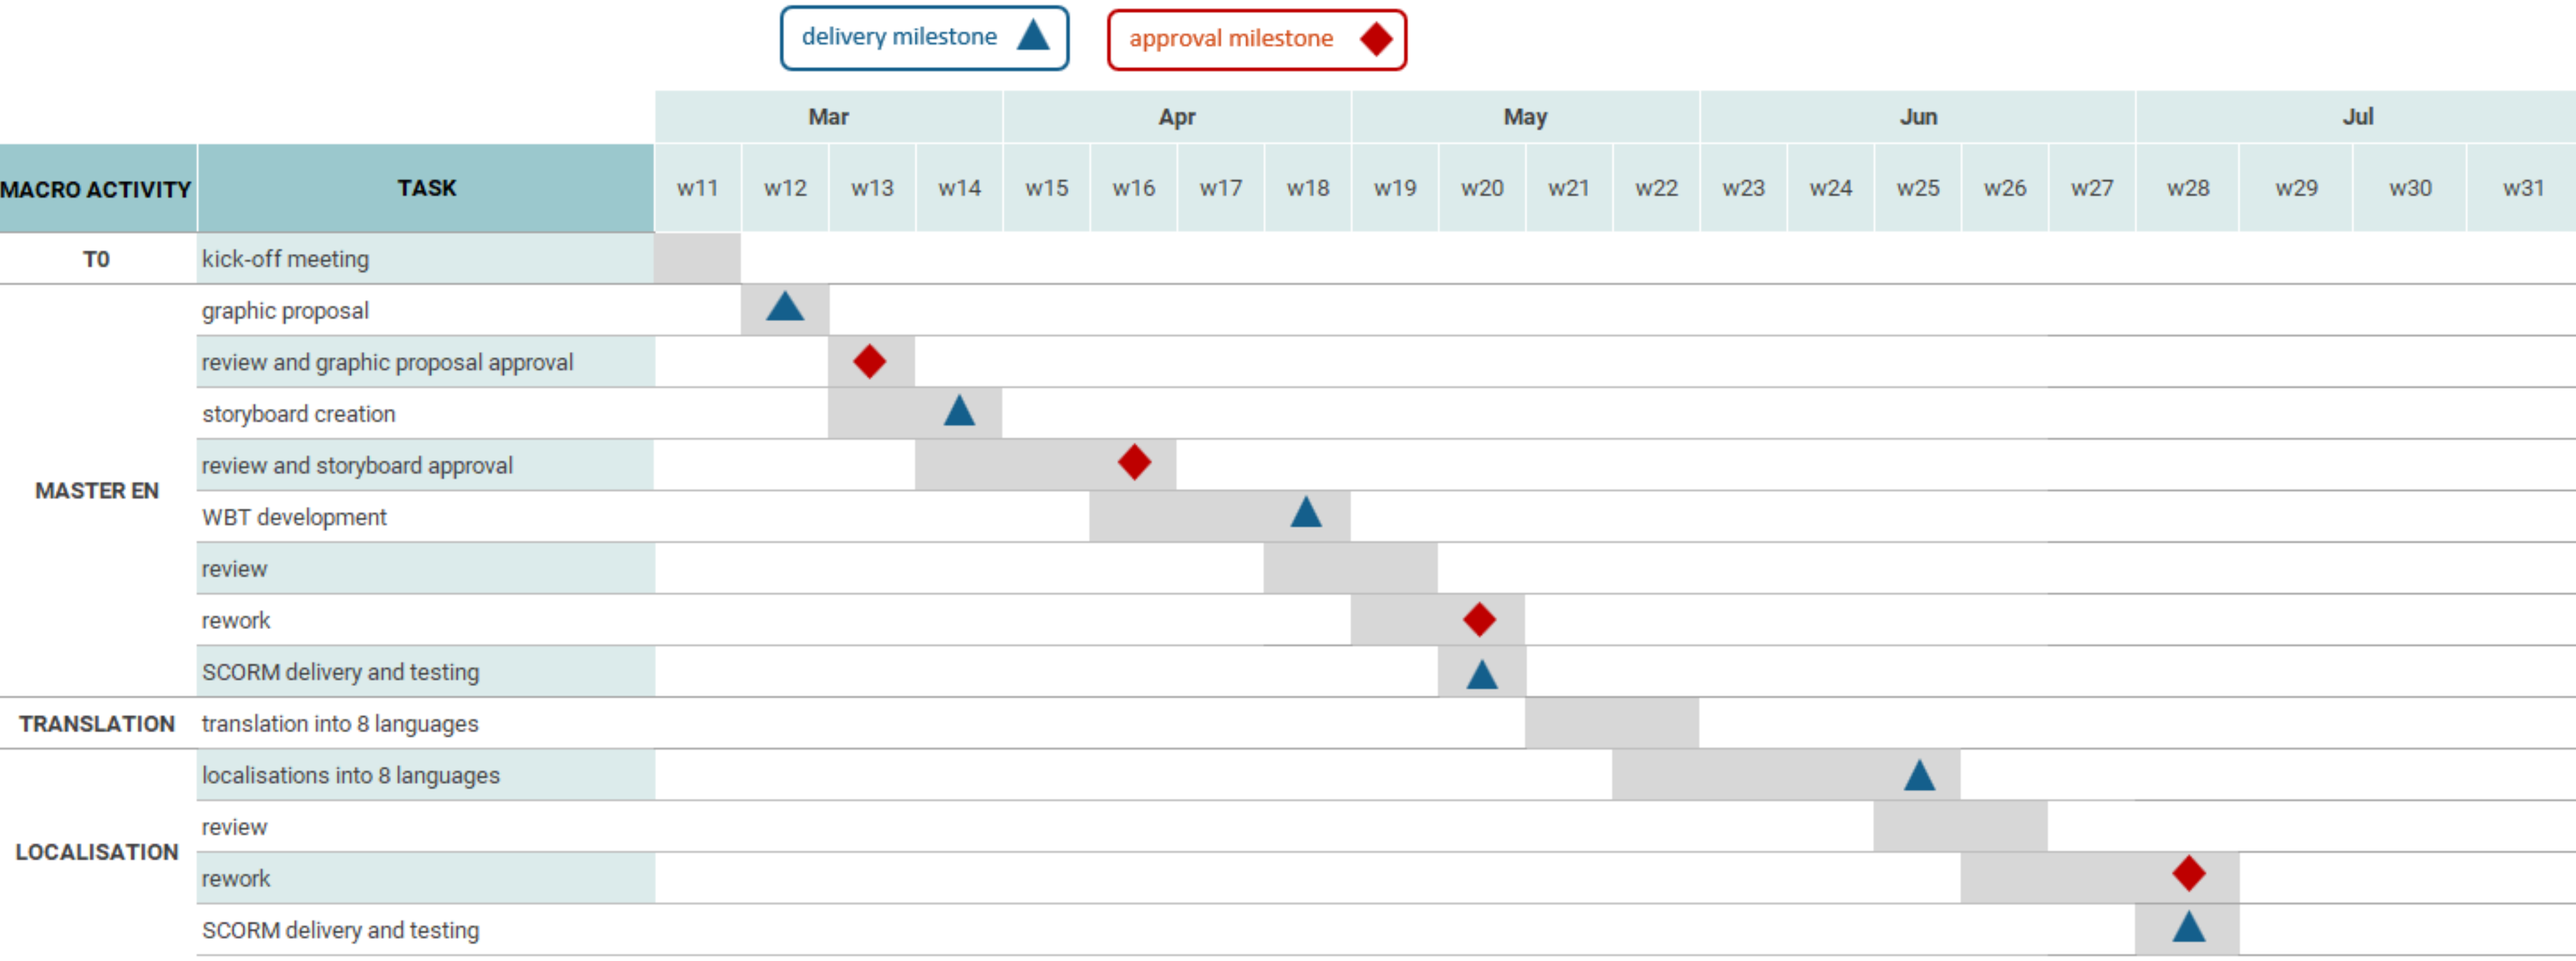

Current status

- Source screenshots currently available in English
- New screenshots (captured only where originals were unclear) acquired in English and in the other languages
- Some screenshots were not captured in all languages; where unavailable, use the English version.

What we need

- Source screenshots in the other languages

CNH - CSPS: PROJECT TIMELINE

MACRO ACTIVITY	TASK
T0	kick-off meeting
MASTER EN	graphic proposal
	review and graphic proposal approval
	storyboard creation
	review and storyboard approval
	WBT development
	review
	rework
	SCORM delivery and testing
TRANSLATION	translation into 8 languages
LOCALISATION	localisations into 8 languages
